

Overview of implemented precautionary and hygienic measures with regard to Covid-19:

- Creation of a crisis unit
- Permanent information for employees via a separate communication channel
- Home office at a maximum extent
- Postponement of studies that have not started, to a yet to be determined time
- Cancellation of some studies to allow for higher distances between study subjects
- Performance of compliance visits via telephone
- Strengthening of hygiene measures for colleagues and all visitors working at the proDERM facilities (including additional disinfection measures, additional dispensers for disinfectants, regular surface cleaning)
- Recommendations for employees when dealing with other people (e.g. avoiding physical contact, hand washing hygiene, optional mouth guards)
- Two-week quarantine (no access to proDERM facilities) for employees after visiting high risk regions or even with contact with someone from a high risk region
- Two-week quarantine (no access to proDERM facilities) for employees with severe cold symptoms, unless Covid-19 is excluded
- Information notice for test persons inside the premises (implementation of hygiene measures, risk of infection through cough and sneeze)
- Information notice for test persons outside the premises (No access for test persons with cold symptoms, coming from high risk regions etc.)
- Obligation to examine persons and guests with cold symptoms by a doctor at proDERM
- Prohibition of study participation of subjects with clear cold symptoms, unless Covid-19 is excluded
